

Cross Timbers Water Supply Corporation

Current Meter Installation Prices – Effective 07/01/2016

Cross Timbers WSC currently installs a 5/8” X 3/4” water meter rated at 25 gallons per minute flow. This is considered a standard residential size meter by the water utility industry.

The current charge for this meter is: *\$8,007.00

Broken down as:

\$7,262.00	Capital Improvement or Capital Expansion Fee, which pays for improvements that have been made to the CTWSC system. Example: Elevated Water Tower, Miles of New Water Mains, etc. (See www.crosstimberswater.com for a complete capital projects history.)
\$150.00	Membership Fee
\$595.00	Labor and materials for Meter Installation
*\$8,007.00	Total

***Those installations requiring a road bore will be more expensive due to the labor and special equipment needed to underbore a road, street, etc. This charge will be at current market prices (approximately \$750-\$1,500).**

CTWSC can also provide a 1” meter for those residential customers requesting greater water flows. A 1” meter is rated at 70 gallons per minute water flow.

The current charge for a 1” water meter is: \$13,172.54

Broken down as:

\$12,127.54	Capital Improvement or Capital Expansion Fee, which pays for improvements that have been made to the CTWSC system. Example: Elevated Water Tower, Miles of New Water Mains, etc. (See www.crosstimberswater.com for a complete capital projects history.)
\$150.00	Membership Fee
\$895.00	Labor and materials for Meter Installation
*\$13,172.54	Total

- CTWSC does not provide meters larger than 1” for residential use.
- Specific information regarding water service costs associated with developments (e.g. subdivisions) that cannot be answered from the General Information sheet should be directed to the General Manager.
